

GUIDELINES FINAL THESIS PRESENTATION

The student presents her or his thesis in 15 to 30 minutes and explains the research question, the approach of the thesis as regards methodology and theoretical framework and the research findings.

Concentrate on your presentation to explain the structure and on the main findings of thesis. Do not try to cover everything from your thesis.

After the presentation there will be a common discussion of your topic and the supervisor will give you feedback. (The students who have started to do their thesis before the academic year 2011-12 will have a peer given feedback from the thesis as well.)

The thesis presentation is an important part of the whole process and it has influence on the grade as well.
