Hardware recommendation for a student computer

General equipment recommendation for different fields of education

Laptop

At least 4 GB of main memory, preferably 8 GB

Windows 10 operating system

A processor at least Intel i3, preferably i5 or similar, also AMD will work

5GHz WLAN

The size of the screen to your liking

It is recommended to extend the warranty period (normally 1 year, ask for the possibility for a longer period)

Hard Disk / Mass Storage: 128 GB SSD or larger is recommended

A good battery that lasts for several hours of continuous use

Camera, headphones and microphone

Options for connectivity to the KAMK AV presentation technology:

- HDMI connection
- USB-C connection

Equipment recommendation for information and communication technology, construction and community technology, mechanical engineering and data processing

Laptop

At least 8 GB of main memory, preferably 12 GB or more

Windows 10 operating system

Processor at least Intel i5, power use needs i7 or similar, also AMD will work

5GHz WLAN

The size of the screen to your liking

It is recommended to extend the warranty period (normally 1 year, ask for the possibility for a longer period)

Hard disk / mass storage: 256 GB SSD or larger

A good battery that lasts for several hours of continuous use

Camera, headphones and microphone

Options for connectivity to the KAMK AV presentation technology:

- HDMI connection
- USB-C connection

Other supported operating systems

MacOS

Linux
