

Submitting the assignment for assessment

Return the assignment by email to [asiasanaa\(at\)kajak.fi](mailto:asiasanaa(at)kajak.fi). Each student must return an assignment even if there are several students involved in searching for information on the same topic. When the assignment has been assessed and approved, you will receive a message of approval, which you can attach to your thesis pass card.

The assessment criteria for this assignment is pass/additional work required

INFORMATION RETRIEVAL FOR UAS THESIS

Name

Group code

THESIS TOPIC:

KEY WORDS:

List key words for general search and words according to the [Finnish Ontology Library Service](#). Consider your topic widely and from all perspectives. YSA: <http://onki.fi/fi/browser/overview/ysa>

BIBLIOGRAPHY

In the assignment, write the source references as they appear in the bibliography. Follow the instructions given in the Thesis Toolbox or in this assignment, you can create the bibliography using the RefWorks reference management programme. Select the APA 6th edition as the template for the bibliography, while engineering students should select the Vancouver template.

DESCRIPTION AND ASSESSMENT OF REFERENCES

E.g. can you use sources in your theses, have you included some sources now which you might not use in the final version, but which might be useful at this stage for finding background information about the topic? Have you found first-hand research on the topic, have university theses been written on the topic before?

While completing this assignment it is not necessary to exploit all the sources you have at your disposal and therefore it is possible to carry out your source assessment using a simple reference or summary.
