

## Why did you choose Finland and Kajaani University of Applied Sciences?

“I have chosen Finland and especially Kajaani University of Applied Sciences because of the offered courses and the arrangement in the university. I really appreciate small groups in courses. As well as the offer of english taught courses are very comprehensive. I found many courses that fit good with my major studies. It perfectly could enlarged my knowledge and expand my point of view to certain subjects.”

“I heard of the 2 students from my school who came last year to Kajaani to study the same as me. Their stories and pictures really convinced me to come to Kajaani to get this life changing experience myself. When I encountered students of your school at the Wooga Game Jam in Berlin who won the 1st place above my 2nd place, I knew for sure I just had to come to Finland and see the magic for myself.”

### Comments on facilities:

“I was amazed when I saw all the things you guys have here. It looks to me like one of the best facilities in the world; good job.”

“Really great facilities. The students have access to so much facilities and almost all for free.”

### Comments on the exchange period as a whole:

“Through the sport activities and tutoring program you can get fast contacts to local students. That was really good!”

“It was a really great time! I’m so happy that I decided to come here. I meet so many nice people and had great experiences in Kajaani and on our trips.”

“I enjoyed the living in the student accommodation. First of all it was very good located. The university’s facilities were very close and therefore easy to reach. The probably best aspect in living in the student accommodation for me was to life together with fellow exchange students. It was great to be non stop in contact and it also helped to support the group learning. Especially the learning from each other. Since the university offered so many sport facilities I always found something to do in my free time. The gym is a really good place. I was glad that there were no charge, so i went there three times a week. It helped for a healthier performance and it also to remove stress. The overall cost of living was little higher than in my home country but I tried to manage every financial matter beforehand. That is why I did not have any problems.”

“My Exchange period was very well. I met a lot of multicultural People and lived with nice people together. I also had a lot of good experiences at my studying time and about finland. I traveled a lot and saw beautiful Areas of finland. A negative point was that we must studying a lot :-). Thank you for this nice possibility and experience.”

“Fucking awesome. ;) That is all.”
