

Finnsku

Finnish educational
material for
Ukrainians

Let's learn the basics of the Finnish language

Finsku is a free digital educational project for learning Finnish, designed especially for Ukrainians. The FinSKU curriculum contains the basics of the Finnish language and is suitable for anyone who wants to improve their language skills for everyday life, study or work in Finland.

The study material consists of six modules that provide mastery of the language through the basics of grammar, key vocabulary and related exercises. The study material was developed by Finnish language teachers Heidi Sippola and Essie Markoff. The project was created with the support of the language centers of the University of Tampere and the University of Eastern Finland in proofreading and translation work.

Finsku does not require downloading or authorization. You just enter a name or a nickname and get a numeric code. Save the code to track your own progress.

The project is running in your browser at: **www.reactored.com/finsku**

If you want to save the results of the progress or return to the previous training section, save the code received during registration.

Use your phone, tablet or computer – Finsku works anywhere, anytime!

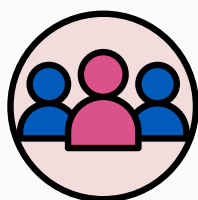

With FINSKU you will master the basics of the Finnish language

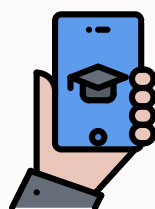

Yle: Suomen kielen alkeet – videomateriaali

- free material for learning the basics of the Finnish language
